

**From:** Richard

I wish to voice my concerns regarding this above reference item: (AB 21-01)

1. Our own Sherriff has claimed emergency water issues - is it wise to allow new ag wells at the volume that is projected-
2. This is not some farm land way out, this abuts a huge residential subdivision that provides this county with high volume of property tax dollars.
3. This subdivision is loaded with children - true - cannabis is legal - but so is whiskey and other spirits but yet most communities do not allow development of bars or production plants within a certain distance. Regardless what the distance is - this size operation is risky to the environment and people of Lake County.
4. As a long time residence of this county I now and always wanted this county to be successful. Has any thought been given to the fact that if this size operation in anyway impacts the value of homes and can be proven in court, can you imagine what kind of bill our county potentially might endure from filing by the potential of diminished value.
5. Overall- I believe that the approval of this project will be a reckless decision by the Board of Supervisors without at least an EIR.
6. You were voted in to represent the people of this County.

thank you in advance for your consideration.
