Subject: [EXTERNAL] Pasta Farm LLC application

To Whom it may concern:

I OPPOSE the use permit application for the Pasta Farm LLC expansion because I am concerned about the loss of so many iconic oak trees that define the character of this part of our beautiful state. Many tanbark and live oaks are already in jeopardy due to sudden oak death. The additional destruction of hundreds of healthy and mature trees is a tragedy that must be avoided. The species that depend on these trees for food and shelter are many and varied. In addition, water management is of utmost importance in the arid west. The estimated loss of up to 35 million gallons of this precious resource will negatively impact the water rights of long-time residents, lead to more arid conditions generally, and undoubtedly increase the threat of wildfire destruction.

Sincerely,

Geof Beasley
