Lead Time: 30-45 Days ARO				
Bidding like item in regards to image tubes. Image tube performance is not dictated by unfilmed or filmed characteristics, they are based on the actual performance metrics of the image tube itself. This remark in regards to L3 or Elbit image tubes holds true and is further backed up by DoD Omni contracts being split between L3 and Elbit to produce current mil spec offerings. The bid item retains all the same ARNVG binocular features of the housings with mil spec meeting or exceeding Elbit image tubes.
