RE: Improving Restoration Efforts at Clear Lake with In-lake Management of Phosphorus

To Whom It May Concern:

SePRO Corporation is the sole manufacturer of new proprietary EutroSORB[®] G and patent pending Phosphorus Fractionation – Level 3 SRTC Comprehensive Analysis. There are no equivalents of these products offered by another vendor suitable for the project outlined by Lake County Watershed Protection District. These products and implementation services offered by SePRO Corporation are needed to perform the project and research proposed and approved by the Clear Lake Blue Ribbon Committee in May 2023;

<https://resources.ca.gov/Initiatives/Blue-Ribbon-Committee-for-the-Rehabilitation-of-Clear-Lake> .

Regards,
