

Honorable Supervisors,

I regret that I am unable to attend in person, but am flying to the CALAFCO Annual Conference in San Diego this morning.

I Strongly Support this item and want to encourage you to read the white paper submitted by former Supervisor Denise Rushing,

She is a Stanford graduate Engineer and energy expert. Her bio is at the end of the white paper. This Board needs to understand the Big Picture and the Long View when considering this Joint Power Agreement. Former Supervisor Rushing would not be in favor unless it would benefit Lake County and its Citizens for many years to come, plus it will save money and benefit the environment. If you have questions or concerns please ask former Supervisor Rushing to address them. When you understand the benefits of approving our participation in Sonoma Clean Power I'm sure you will support it.

Ed Robey

Former District 1 Supervisor, 3 terms
