

Dear BOS,

I would strongly suggest to oppose UP20-96 for the following reasons.

1. The county road system in this area cannot support the amount of traffic that this project will be bringing to the area. Further more the access to this site from any end is not 4290 Compliant. This is a public safety issue and proposes more of a threat than anyone can imagine.
2. The water use for this amount of plants is not possible. They will say they are going to use the amount of water that looks appeasable on paper but it will take 10x or more to achieve their goal.
3. The amount of serpentine soil that is proposed to be moved is unimaginable . I cannot see how Air Quality would be able to approve this site.

There are many other reasons why this project should be denied and I assure you will hear them through this hearing.
