---

Good Morning

I would like to voice my concerns about the possibility of PSPS during this pandemic. My husband is disabled and being without Air Conditioning and some of his medical equipment is a profound risk to his health and safety.

We have a generator but it isn't powerful enough to sustain Air Conditioning and it is strenuous to keep it running.

We can't afford a stay at a motel for days at a time and travel out of county to a motel adds risk of exposure to the virus. I am an essential worker and need to be close enough to commute and still be able to assist him and monitor his health.

Any senior center that might be set up adds the same risk of exposure to our most vulnerable. What can the county do to protect our seniors from this potential disaster, in of itself a potential disaster.

Thank you
