

I too support the appeal of PL25-198. In view of the way the High Valley pot farm was handled by the county, I'm more than a little concerned about water management. I now have to truck in water for my home to replace the water from my well that went dry...a well that served me for over thirty years. I'm also concerned about the way the High Valley pot farm was able to perform non inspected electrical construction before the authorities having jurisdiction intervened. If the issues that occurred at the High Valley pot farm are a reflection of how this new project will be handled, it can't be a good thing...

Also, your message to Maria Kann ("can you please have Logan email me their comment directly?") was a bit inappropriate...I have no problem with you addressing me by my first name (Doug) or my last name (Mr. Logan) but simply "Logan" is poor etiquette. I also question your use of the term "their" for a single person.
