

To Whom It May Concern,

As a long-time (twenty-year plus) resident of Lake County I am writing to express my support of the appeal of the Highland Farms permit to establish a cannabis growing operation adjacent to the Highland Springs Recreation Area (HSRA). This appeal should be approved and enforced because the proposed development is within 1,000 feet of the HSRA in violation of a county ordinance prohibiting cannabis cultivation within 1,000 feet of public lands and because no environmental impact plan is in place to deal with legitimate concerns about health hazards created by the asbestos (carcinogen) byproduct of construction of buildings and roads on the serpentine soils that predominate in the area.

Thank you,
