Eric: same stuff – a survey should be required to demonstrate setbacks are being met by a licensed surveyor and no encroachments into adjoining or the road right of way.

Greetings. We have received a request for a commercial cannabis application. The request would permit a 10,000 s.f. cultivation area with 8,600 square feet of plant canopy. The application is not complete; we have not received some key parts of the property management plan, including a cultural study.

Please return your comments to me on or before July 18<sup>th</sup>. If you need additional information, please let me know.

Thanks,

Greetings!

We received an application for a 10,000 s.f. (outdoor) commercial cannabis cultivation license on the property shown in the RFR and on the site plans attached.

Thank you for your concern; we need non-consultation comments back on or before July 18<sup>th</sup>. If a Consultation is sought, we need to have the request in writing on or before August 3, 2019.

re: MUP 19-11 / Nick Needham / APN 007-059-02

LAKE COUNTY COMMUNITY  
DEVELOPMENT DEPT

Dear Mr. Porter:

Records at this office were reviewed to determine if this project could adversely affect cultural resources. Please note that use of the term cultural resources includes both archaeological sites and historical buildings and/or structures. The review for possible historic-era building/structures, however, was limited to references currently in our office and should not be considered comprehensive.

**Project Description:**

Minor Use Permit MUP 19-11 – a request to establish one A-Type 2 outdoor commercial cannabis cultivation area on an existing 88.97 acre property. Total proposed cultivation area is 10,000 s.f., and the total proposed canopy area is 8,600 s.f.

**Previous Studies:**

XX This office has no record of any previous cultural resource studies for the proposed project area (see recommendation below).

**Archaeological and Native American Resources Recommendations:**

XX The proposed project area has the possibility of containing unrecorded archaeological site(s). However, as per the project description, there is to be no ground disturbance and further study for archaeological resources is not recommended at this time. Should the description of this project change, we recommend further review for the possibility of identifying Native American archaeological resources.

XX We recommend the lead agency contact the local Native American tribe(s) regarding traditional, cultural, and religious heritage values. For a complete listing of tribes in the vicinity of the project, please contact the Native American Heritage Commission at 916/373-3710.

     The proposed project area has a low possibility of containing unrecorded archaeological site(s). Therefore, no further study for archaeological resources is recommended.

**Built Environment Recommendations:**

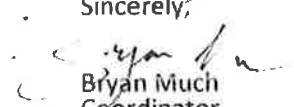

XX Since the Office of Historic Preservation has determined that any building or structure 45 years or older may be of historical value, if the project area contains such properties, it is recommended that prior to commencement of project activities, a qualified professional familiar with the architecture and history of Lake County conduct a formal CEQA evaluation.

Due to processing delays and other factors, not all of the historical resource reports and resource records that have been submitted to the Office of Historic Preservation are available via this records search. Additional information may be available through the federal, state, and local agencies that produced or paid for historical resource management work in the search area. Additionally, Native American tribes have historical resource information not in the California Historical Resources Information System (CHRIS) Inventory, and you should contact the California Native American Heritage Commission for information on local/regional tribal contacts.

The California Office of Historic Preservation (OHP) contracts with the California Historical Resources Information System's (CHRIS) regional Information Centers (ICs) to maintain information in the CHRIS inventory and make it available to local, state, and federal agencies, cultural resource professionals, Native American tribes, researchers, and the public. Recommendations made by IC coordinators or their staff regarding the interpretation and application of this information are advisory only. Such recommendations do not necessarily represent the evaluation or opinion of the State Historic Preservation Officer in carrying out the OHP's regulatory authority under federal and state law.

For your reference, a list of qualified professionals in California that meet the Secretary of the Interior's Standards can be found at <http://www.chrisinfo.org>. If archaeological resources are encountered during the project, work in the immediate vicinity of the finds should be halted until a qualified archaeologist has evaluated the situation. If you have any questions please give us a call (707) 588-8455.

Sincerely,

  
Bryan Much  
Coordinator

**Subject:** [EXTERNAL]Re: RE: RE: RE: Minor Use Permit (MUP 19-11) Request For Review

Hi Victor,

Because you have clarified that no ground disturbance will take place for the build out of this project, the Tribe does not request any further consultation (including cultural monitoring) on this Minor Use Permit. Please flag this property for Big Valley concern if there are any additional permits or ground disturbance with any future projects or activity. Thanks!

Sarah Ryan

Hello Sarah,

Just sending a follow up email per our discussion held over the phone this morning. We discussed on the phone that Big Valley Band of Pomo will not be requesting consultation, nor a monitoring agreement. Could you confirm this? Let me know if you have any questions, thank you.

Sincerely,
