With the focus to revise the Cannabis ordinance to clearly delineate a project's requirements and make sure all parties can easily determine what prerequisites must be met to initiate a project and the provisions for on-going accountability, is a laudable goal. We want to ensure any newly proposed Cannabis installations are compatible; do not impact the existing agriculture (i.e. grape taint), community surroundings, and population area(s). Consideration of the county's general plan, the scenic corridor and making sure those who must monitor the ordinance's implementation requirements have the tools they need and, to have clear unambiguous guidelines is why this process is essential. Assisting with moving this proposal through the community education and input, discussion and recommendation stages is why I would be honored to be selected to be one of the members of this task force committee.
