There is no identifiable impact to CHP Clear Lake Area's local operations for the proposed cell tower.

[Warning: This email originated outside of CHP. Do not click links or attachments unless you recognize the sender and know the content is safe.]

Greetings!

We've received an application for a new 170' tall lattice cell tower. This tower is somewhat close to a recently-approved tower located just south of the Hwy 20/53 roundabout.

This particular tower had been approved in 2019, but expired before a building permit was submitted. This RFR is a resubmittal of file no. UP 17-03.

Please have comments back to me by June 22, 2022 if possible.

Thank you,
Eric Porter

Eric,

Parcels 010-009-42, -39 and -40 are all located outside of any Special Districts service area. No Impact.

Have a great evening!

Eric,
This project is outside the Special Flood Hazard Area and is not a subject to the Floodplain management requirements. The project is outside the Community Growth boundaries and is exempt from the Stormwater management MS4 LID requirements, however since the project is in the North Fork Cache Creek watershed, construction phase BMPs could be recommended.
There would be no further comments.
