JA

Please consider this email an appeal to the Board of Supervisors to allow Verizon to install a tower in Kelseyville to improve cell service in that area. It is imperative that our Lake County residents have good cellular access no matter where they are in the county.

Thank you for your cooperation in enabling all of us to be better connected!

I would like to point out that this picture is at hwy 29 and Kelsey creek dr. I would like the board of supervisors to approve the cell tower in kelseyville. Our phone service is poor and we would benefit greatly with the installation of this tower please. So many people rely on their cell phones and no longer have a land line. It is therefore important that we have access to good cell service in case of an emergency.

Thank you for considering this matter!

D

I am a 30yr resident of Kelseyville, and my husband and myself support the new tower for improved cell service for Kelseyville. I live just outside of downtown Kelseyville, and our 4G data and phone service is marginal.

Thank you

Debbie and Mark Meadows

CK

To the Lake County Board of Supervisors

I reside in Buckingham and am a Verizon customer. I am writing in support of the new tower.

There are numerous "dead spots" in Lake County, including certain areas on my way to Lakeport. As a single woman who relies on her mobile device, I need coverage in case of an emergency. The tower will also help other mobile service providers, as they will lease space from the Verizon tower. The aesthetics will blend in with the current surroundings.

The tower is a win/win for the residents and the county. Please vote yes on the tower.

Regards,

Cindi Koehn

Out of respect for my neighbors I would rather see that Verizon tower be located near hwy 29 up on the hill at the following address:
6738 Live Oak Drive, Kelseyville. This location would probably have less resistance from the locals.
