---

I think you are having a board meeting today, could you please ask Dr. Pace and the other supervisors these questions? No need to mention my name, just say anonymous I guess:

Dr. Pace, why are you waiting to enforce mandatory masks? You keep saying you're going to and never do. We are prepared for it! We've had months to prepare! No need to wait. People need that protection now, not a week from now.

The whole community is very upset about the allowing out of county boats on the lake. If you all knew that you couldn't enforce (because of discrimination) then why didn't you tell us that before opening the lake instead of after it was already done? You all have lost community trust because of that move. It is not safe with others coming here. The stores were packed. If you can't handle enforcing it, then the Lake shouldn't be open at all.

Thanks!
