Board of Supervisors,

We now have out of towners using the lake, and potentially bringing the virus with them. This is on top of people already NOT wearing a mask or sheltering in place here.

A mask helps to insure you not only help keep yourself safe, but also protects others.

The CDC has said this multiple times, on multiple occasions.

Whatever anyone thinks about the virus, its origins, that it's a "hoax" or whatever, can't ignore that over 80k people have died in two months.

I've been told by both north bay and south bay family that the public is wearing masks at an almost 100% rate. Why is it so hard for people to follow the "rules" here?

Please, require masks be worn in our community, and help protect the seniors and high risk people of Lake County.

Myself and thousands, yes thousands, thank you.

Kind regards,

Cindi Koehn
