---

If we go down a path of mandating masking.  
At what point do we afford the people the right to free choice? I understand the health officers concern for public safety thats sort of his job. But I feel we need to balance towards the fact that people need to be afforded the right to be responsible for their own safety. This is America not dictator N.Korea. questionnis for doctor pace. Where do we draw the line as a county? Thank you.
