Re: Public Health - COVID19 response

I'm not one to elaborate on end about a topic, so here's my point.

The Public Health Department needs the administrative and civil authority to enforce Public Health orders, including the ability to enforce masking and social distancing standards as part of a comprehensive response to the COVID19 pandemic.

Otherwise, what's the point of having a public health department?

Public Health order 7.4 must have teeth!

Okay, I've said my piece!
