**Subject:** [EXTERNAL] Alpine Meadows subdivision road acceptance

Hello Gordon,

Thank you for helping with the Alpine Meadows subdivision roads becoming non maintained county roads. This Resolution gives the Cobb Area County Water District (C.A.C.W.D.) the necessary conduit to provide clean safe potable drinking water.

We do not feel a public hearing is needed to discuss the proposed water project in Alpine Meadows .

When the project is completed and all new water main and new service connections have been made. The People of Alpine Meadows would then have the options of becoming C.A.C.W.D. customers, staying with their current water source or both with the aid of back flow prevention. All parcels will have a service ran to them but no one will be forced into connecting to C.A.C.W.D.

The underground construction to take place in the roads will not only provide drinking water and fire hydrants. It will also improve the current conditions of the roads. We are not trying to upset anyone involved in this project. Are only goal is to provide potable water and fire protection.
