Subject: [EXTERNAL] Fines
Date: Monday, August 3, 2020 8:02:27 PM

Dear BOS,

We have been down this road before. Each time it was said that fines are not the right message to send to citizens of this county. You say you want to help them one day, And the next you say you want to fine people.

When is this madness going to come to an end. Why do we continue to go down this road? Because the governor says we have to or hes going to pull our funding? The same funding he's been holding over our heads since march? Im sorry but the numbers do not show that lake county is experiencing a problem I certainly disagree with you in that respect doctor Pace and let me tell you why. Im not a doctor but common sense says that 1 alleged death out of hundreds of cases we had in this county only proves that the medical staff has figured out a way to efficiently treat this thing.... thats what the numbers say. And before you go saying they don't..... think of this.... how many of those people recovered in their own homes? We have not even had over 10 hospitalizations at one time in this county since the start of the health emergency. Thats a fact.

I dont believe in coincidence so here we go talking about a long stick to bring down on top of our businesses. How does this board sleep at night. Covid 19 is not causing the health crisis in our county. Each and every one of you who decide to cast a yes vote on this ordinance is manufacturing the health emergency. I wish we had a BOS with the gumption to stand up to the dictator sitting on capitol hill unfortunately those who do have the gumption are outnumbered by the fear motivated. The rest of you are perfectly willing to throw out our freedom to choose when it comes to our bodies and what we put on our faces. This is not a no shirt no shoes no service policy and you know it. Its the government pushing their weight around for nothing more than to establish some sort of control. I want you to remember something. A yes vote will not necessarily bring compliance in this county. It will bring rebellion and thats whats going to come of it. We seen it when the county tried to shut down the lake, and we seen it when the people protested to reopen the county. Obviously the majority of your constituents disapprove of these actions. We are doing our best to keep it peaceful but one of these days you need to consider the fact that someday that peace is going to run out. The question is.... when making decisions regarding the freedoms bestowed on the people and exchanging them for the guise of safety.... where do you draw the line?
