Follow Up Flag: Follow up
Flag Status: Completed

Rob,

The applicant name should match the owner's name so the water rights would be determined or the written consent should be submitted.

I need the documents proving the legal water source – well's documents or water rights documents in case of surface water diversion.

The documents to support Water Use – water availability part of PMP should be submitted – water meter info, continuous water level monitoring methodology and supporting docs should be submitted.

Storm water BMP's location and the drawings reflecting it should be submitted.

Yuliya
