Hi Mr. Porter: Tara Gabe mentioned there will be a hearing regarding the grow on Rodello Road that many of us neighbors would like to have information about. I also am concerned about another location on Rodello that seems to be somehow linked to the grow called Stella Green Farms. That address is 400 Rodello Rd. There seems to also be a 3rd location on 100 Rodello Rd. that is being worked on for a grow site. How do interested neighbors become included on this list with the hearing date? Thank you. My name is Carol Thorn P.O. Box 251 Lakeport, CA 95453. 707.349.6847 drthorn80@sbcglobal.net

Good morning Tara,

This project was issued a temporary cultivation permit last year. We will not be re-issuing that permit again – they will need to wait for the public hearing to decide whether the County will approve the license they have applied for.

I would suggest you email me with your mailing address so I can put you on the list to receive the public hearing notice, which will allow you to state your concerns to the Planning Commission. My role is to evaluate a project to see whether it meets all the applicable codes, Plans and regulations for this type of activity at a specific location.

Take care,

Eric Porter

Mr. Porter, I am Tara Gabe and I live at 450 Rodello Rd, Lakeport, CA. The above marijuana grow is located at the corner of Highland Springs Rd and Rodello Rd. I live about 1/2 mile from it, and I must drive by it everytime I want to leave or return to my home, or get my mail.

Last year every time I traversed down Rodello Rd, I had to drive by their armed guard. For many months the smell was horrible. The privacy screens they put up only advertise that there is a very large "grow" there - which is one reason they need an armed guard. Which brings up the fact that marijuana grows seem to attract violence. In addition, we are currently in a severe drought, and my family has a well. Our neighbor has stated that the level of water in his well dropped a lot last year. I am very worried that the Stella Green project will deplete our water table to the point we will need to import water at a great expense to us. In addition to the Stella Green grow, the house next to us (I think the address is 350 Rodello Rd) appears to be a marijuana grow. Besides the smell during the summer months, they put in a solid wood privacy fence, hauled in many dump trucks full of soil, and there doesn't seem to be anyone actually living there.

In addition to this, the Steve Vaughn property farther down Rodello Rd recently sold to someone who stated he planned on putting in a marijuana grow, and the privacy fence and larger water tanks have already gone in. Next will follow the armed guards, reduced water in our well, the stench of growing marijuana, and the threat of violence that seems to follow this type of business.

Our "community" back in our little valley is filled with families raising children, growing small gardens, and riding horses. These marijuana grows threaten us, they stink, have brought stress, and tension to our otherwise family oriented little community, and threaten our ability to live here by their increased water use. I really do not want them here.

Thank you for your consideration.

Tara Gabe

Mr Porter, has the Stella Green project come up for review yet? I would like to put my two cents in - adjusted for inflation!
