4.2 Consideration of Potential Use of Eastlake Landfill as a Final Disposal Location for Debris Generated from the 2017 Wildfires Located Outside of Lake County

Public Services Director Lars Ewing presented the item to the Board. The Eastlake Landfill is located closest to the Redwood fire in Potter and Redwood Valley. The U.S. Army Corps of Engineers contractor ECC has asked if Lake County could accept the debris from the Redwood Valley fire. This is a cause of concern as the landfill has eight to ten years of air space left, which puts the life of the landfill to 2025 or 2027. The debris total estimate is 75,000 tons and would amount to one year of air space. On a regular basis, the landfill takes in 40,000 tons of debris per year but is not as dense as fire debris. The Landfill expansion project is in the preliminary stages and is about 5-6 years out. Operations at the landfill would need to ramp up to take on this project. County Code states the landfill is for county debris only, Board approval would be necessary to move forward. A \$65 per ton fee would cover cost of operations at the landfill.

Chair Smith asked if anyone present wished to speak and the following people spoke: Mike Dunlap, Joe Wordey of ECC and Joan Moss. No one else wished to speak and the public input portion of this item was closed.

There was Board consensus for no action taken.
